

COMPANY OVER VIEW

GENERAL OVERVIEW

Impes Service has a more than forty-year experience in electro-instrumental sector. It provides mainly construction, installation and O&M services.

The Company customers are mainly major Italian players with a long term and reliable relationship with IMPES Service due to strong competences, full service capabilities, after sales service and overall workforce performance.

The Company is headquartered in **Basilicata**, south of Italy, in **Ferrandina (Matera)**, **has branches companies in Europe and North Africa** and thanks to its worldwide network is able to provide services also in other countries.

IMPES Service has the wherewithal to potentially work even in the most remote angle of the globe, nevertheless is focused on covering mainly Europe, Maghreb and other Countries in Africa, even with permanent establishments or branches.

IMPES Service has an open-mind and respectful approach to the different cultures that meets up when abroad, and that gives it the capability to easily adapt itself to the various local contents. IMPES Service doesn't simply works abroad. The company is committed in becoming familiar with the Countries where operates, to reach a full understanding and respect of local laws and habits.

IMPES Service has got the right person for the work in every angle of the world. Thanks to its background and its network, IMPES Service can mesh up the quality standards and experience guaranteed by its managers, with the added value, skills and sensibility provided by local talents.

Thanks to its approach, it doesn't make very difference for IMPES Service to work in Italy or abroad.

For IMPES Service, home is where IMPES Service is.

MAIN IMPES SERVICE ACTIVITIES

POWER GENERATION AND DISTRIBUTION

IMPES Service SpA has great experience in planning, building and automating electrical systems for electric and thermoelectric power stations.

IMPES Service is awarded with the most important certifications in the field and qualified by some of the biggest global players.

OIL & GAS

IMPES Service SpA, thanks to its solid organization, is also able to execute the construction of off-shore rigs for hydrocarbon extraction all over the world.

Quality and safety are the essential elements in every phase of planning and construction of an oil plant, ensuring maximum efficiency even in the smallest detail.

CHEMICAL AND PHARMACEUTICAL

IMPES Service SpA can satisfy a wide range of needs on chemical field. Main activity is the construction of ethylene, polyethylene, propylene, butane and butylene, thermal and catalytic cracking plants.

IMPES Service is also active in pharmaceutical field, where started its activities building Lepetit plant in Brindisi, focusing on advanced technology and quality.

AUTOMATION

IMPES Service SpA commercializes and supports a wide range of regulation and supervision systems, from heating, venting and conditioning systems to complete technological and safety plant management for public and private buildings.

Software flexibility enables to personalize these systems to different needing.

MAIN IMPES SERVICE ACTIVITIES

STEEL AND CEMENT PLANTS

IMPES Service SpA has a long lasting tradition in the field of iron & steel and cement plants works.

Electrical and instrumental construction and assemblages have been executed in some of most important plants in this field, with obsessive attention on safety and quality.

TELECOMMUNICATIONS

IMPES Service achieved excellent skills and experience on engineering, execution, up keeping and fixing of:

- Landline and mobile telephone systems and infrastructure, access control systems;
- Data transmission and telecommunication systems and infrastructure

O&M E GLOBAL SERVICE

IMPES Service SpA carries a twenty years lasting experience on both ordinary and extraordinary maintenance.

Thanks to its efficiency and quickness, guaranteed by skilled and professional manpower, IMPES Service is able to acquire long-lasting global service contracts, besides the core electrical and instrumental up keeping.

ETHICS AND RESPONSIBILITY

IMPES Service takes its social role very seriously.

Being part and engine of the economic growth of a critical area of Southern Italy, employing over 250 employees in offices and construction sites, is not enough for IMPES Service, and for this reason it has given itself a rigorous code of ethics.

IMPES Service is actively engaged in promoting ethical work and gender equality, rejecting all forms of discrimination, exploitation and mistreatment of workers, and paying great attention to their safety and health, implementing every measure necessary to guarantee higher standards.

MAIN CLIENTS (2013-2026)

THE VALUE CHAIN

IMPES Service SpA discloses its broad offer along the entire value chain, directly or through its worldwide network of high specialized and skilled partners.

From early engineering to delivery and operation and maintenance, IMPES Service offers turnkey contracts beside single or multiple phases contract, down till contracts for single activity.

IMPES Service owns in its DNA the capacity to satisfy every customer necessity and request. Its heritage of **customer-oriented approach**, from the early days of the company, lasts till today.

This vision is shared with its trusted partners, that can support providing high specific and technical services in case of need. The capability of the company offers a vertical approach providing high quality standards to deliver always the best to customers.

IMPES Service is also fully engaged in promoting safety at any level in its work: thanks to its attention to safety and the awareness of the social role it plays, Impes Service has been honored by safety awards from the major international players in the sector, both in plant turnarounds and in ordinary activities, exceeding not only the legislative safety standards, but also the most stringent regulations set by our valued customers.

THE VALUE CHAIN

PROCUREMENT

Parts and equipment procurement for installation and set-up of construction and maintenance projects, depending or not to plant construction

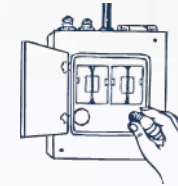

ENGINEERING

Engineering analysis of plant and systems construction projects

O & M

Operation activities and periodic or extra-ordinary plants and systems maintenance

COMMISSIONING

Tests , checks to allow plant and systems start-up
